

WHITE HYBRID MAIZE

LAKE 501

Maturity: Early Medium

Grain Colour: White

Grain Type: Semi Dent

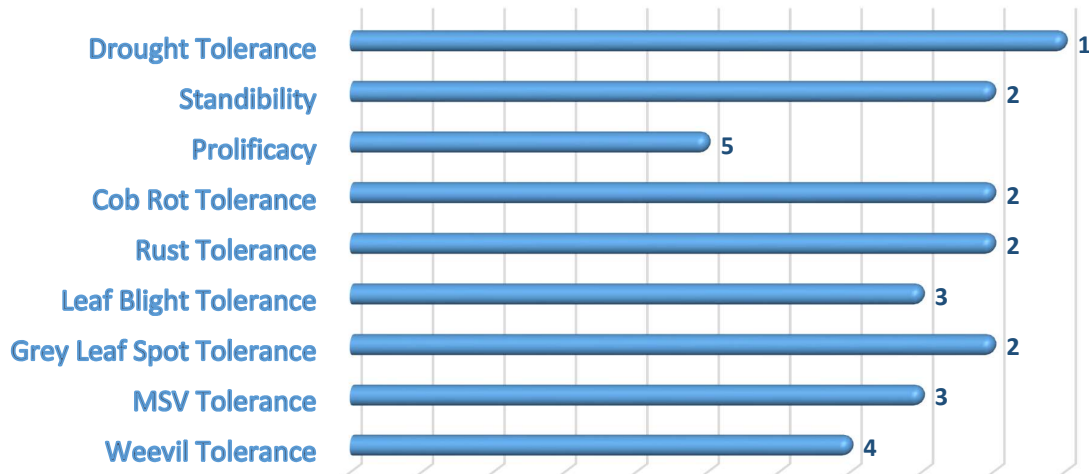

Days to 50% Flower: 68

Days to Harvest (12% RGM): 125

Yield Potential: 10Mt/ha

LAKE 501 is an early medium white maize hybrid that shows extreme drought tolerance. Its ability to remain dormant in dry periods and bounce back to give farmers a sound yield is unrivalled. The plant has well placed, low cobs with a thick stalk ensuring that the plant remains standing until harvest. LAKE 501 has excellent resistance to all major leaf diseases.

1 = EXCELLENT; 5 = AVERAGE; 10 = POOR
