

WHITE OPEN POLLINATED MAIZE

ZM 521

Maturity: Medium

Grain Colour: White

Grain Type: Flint to Semi Flint

Days to 50% Flower: 68

Days to Harvest (12% RGM): 125

Yield Potential: 5Mt/ha

ZM 521 is a white semi-flint grain maize with excellent GLS resistance and was bred by CIMMYT for Sub-Saharan Africa. It has an intermediate maturity.

ZM 521 excelled particularly under drought and low fertility conditions. The grain is flintier than grain of commercial hybrids. Farmers perceive that flint grain dries more quickly and stores better than dent grain.
